

PRODUCT PROFILE

DECK-PATCH

TUFF SYSTEM ADVANTAGE

Deck Patch is a cement based modified polymer which can be sanded to create a smooth substrate for the installation of Tuff PVC membranes. Deck Patch dries to a hard smooth surface while maintaining excellent mixing and workability in its non-cured form. Use Deck Patch to fill plywood joints and imperfections in the substrate such as de-lamination, voids and knots.

For additional information, specifications, CAD drawings or MSDS, please contact Tuff Industries Inc. **Toll Free: 1-877-860-9333**

NOTES: This document is not an installation guideline. Tuff Industries Inc. will not be responsible for the improper use or installation of its products.

FEATURES

- Dry powder formula
- On site preparation
- Available in pails for easy transportation
- Compatible with all Tuff membranes

TECHNICAL NOTES

- Apply at temperature between 50°F - 100°F / 10°C - 38°C
- Application Thickness: to 1/2" / 12mm
- Cure time: 12 hours

PACKAGING

- Single Pails : 5 lb. / 2.27kg
- Single Pails : 10lb. / 4.54kg
