

PRODUCT PROFILE

TUFF-CLAD PVC METAL FLASHING

TUFF SYSTEM ADVANTAGE

Termination details can be difficult in the Deck and Roof waterproofing industry. Tuff-Clad now offers the most efficient and permanent solution for terminating your membrane details. Tuff-Clad is fastened to the substrate and the membrane is welded to the PVC metal to ensure a long lasting waterproof finish.

There is now no need to adhere the membrane over the edge, mechanically fastening your terminations and risking separation and water penetration.
