

PROJECT PROFILE

THE TUFDEK SOLUTION

As one of Utah's premier resort home builders, Cole West homes sought a waterproofing solution for their waterproof deck areas that would provide the exceptional performance, quality and appearance they are known for in all their communities.

The design and flow of their floor plans extend indoor living space seamlessly to the outdoors allowing homeowners to fully enjoy the incredible desert vistas surrounding them. The need for a functioning watertight roof on the second level decks located over living space was paramount, as was a finished appearance that fit into the design style of the surrounding desert environment.

As the strongest walkable roofing product available on the market, Tufdek, backed by a 15-year warranty and installed by Authorized Dealers, provided Cole West and their homeowners beauty, functionality and peace of mind all in one package.
